PROFESSIONAL SUMMARY

Full-Stack Developer | AI & ML Enthusiast | UX/UI Designer

Passionate about building intelligent, scalable, and user-centric web solutions. Skilled in the **MERN Stack**, **AI - integration**, and responsive UI/UX design, with hands-on experience deploying full-scale applications and integrating TensorFlow and Gemini AI models. Driven by a problem-solving mindset and a strong focus on end-to-end project execution — from concept to deployment — ensuring innovation meets functionality.

EDUCATION

Bachelor of Technology (B.Tech) in CSE(AI & ML) 2022 - 2026

Sri Indu Institute of engineering and technology , Hyderabad

CGPA: 7.37

SKILLS

- **Programming:** JavaScript, Python, HTML, CSS, MongoDB.
- **Frameworks & Tools:** React.js, Node.js, Express.js, TensorFlow, scikit-learn, GSAP, Docker , Grafana , HuggingFace , Tailwind CSS.
- **Core Competencies:** MERN Full Stack Development, AI Model Deployment, API Integration Microservices, Responsive UI Design, Version Control(Git), Cloud Deployment.
- **Soft Skills:** Analytical Thinking, Collaboration, Leadership, Adaptability, Empathy.

PROJECTS

- **LeafGuard – Plant Disease Detection**
AI-powered MERN application for analyzing plant health from images with care tips using TensorFlow & Gemini. Achieved **95% accuracy** in plant disease detection using CNN. Integrated with **Grafana** for real-time database visualization and performance monitoring. **Source code** : [\[Github Repository\]](#) | **Live demo** : [\[LeafGuard\]](#).
- **DocuAgent**
A **Generative AI-based** documentation automation tool built using **MERN** and **Gemini AI** .Reduced document generation time by 60% through automation using Gemini AI.
Source code: [\[Github Repository\]](#) | **Live demo** : [\[DocuAgent\]](#).

Certifications

Completed **“The Nuts and Bolts of Machine Learning”** by Google — learned data preparation, model building, and evaluation using Python. Skilled in supervised & unsupervised learning, feature engineering, and performance optimization. [View](#).

Completed **“Google AI Essentials”** by Google — gained practical skills in generative AI, prompt engineering, and responsible AI use. [View](#) .

Completed **“Google UX Design Specialization”** by Google — mastered end-to-end UX design process including research, wireframing, prototyping, and usability testing. [View](#) .

Completed **“Google Advanced Data Analytics Capstone”** by Google — applied machine learning, regression, and predictive modeling to real-world data projects. [View](#) .
